

Plate Lube - Graphite Water Concentrate

DESCRIPTION: Designed to provide a dry film graphite coating for high temperature applications. Provides a durable lubricating coating with excellent abrasion resistance.

USES INCLUDE: Use as is for brush application.
Can be applied to move clean dry surfaces free of oil and scale.
May also be spray applied to surfaces heated to a minimum of 250°F.
For spray application, dilute with 2 to 10 parts water.
After dilution, occasional agitation is needed to insure best results.

PRECAUTIONS: Do not allow to freeze.
Always reseal containers when not in use to prevent evaporation and contamination

TYPICAL AS RECEIVED PROPERTIES:

Appearance:	Grey/Black Pourable Liquid
Carrier/Diluent:	Water
Flash Point:	None
Freeze Point (°F):	32
Lubricating Pigment:	Processed Graphite
pH:	8 - 9
Shelf Life:	1 Year Under Original Seal
Solids Content (%):	30.0
Specific Gravity:	1.20
Weight/Gallon (lbs):	10.0

The values reported above are average values derived from production data encompassing many different sizes and shapes. Actual data will vary to a small degree naturally and as a function of size and shape. This form is not intended to be used for purposes of specification; it is informational only.
